

**REMARKS**

Formatting corrections have been made to fields <140> (US serial number) and <141> (filing date) to update this information in both the paper and computer readable forms of the sequence listing. As per the CRF Diskette Problem Report, Protein sequences 2, 4, and 6 have been listed separately, having been previously listed along the DNA sequences 1, 3 and 5 as their corresponding coding sequence translation. Applicants state that thus no new matter is added.

Applicants courteously request entry and early allowance of all pending claims.

Respectfully submitted,

MARTIN ADAMCZEWSKI  
NADJA OELLERS  
THOMAS SCHULTE
